Durham Ferry Outdoor Education Center, 29393 S. Airport Way, Manteca

At this workshop, you will receive a FREE copy of the award-winning *Project WET* guide containing more than 90 engaging and effective activities, and be among the first to be introduced to the California Coastal Commission's newest curricular resource, *California Coastal Voices*, which was designed to assist secondary teachers in following California's Next Generation Science and Common Core Standards.

In this workshop you will receive tools and tips to help your students explore natural systems, investigate local environments as a context for learning, and become empowered to participate in decision-making about complex natural resource management issues. There will be a focus on remote sensing skills, modeling, problem-solving, and communication. We'll explore the history and programs at Durham Ferry with San Joaquin County Office of STEM staff. This workshop will take place both inside and outside the classroom.

Space is limited. **Please register by April 25** to Annie.Frankel@coastal.ca.gov, (415) 597-5888. Include the spelling of your name, email, phone number, grade(s) taught and your school or organization as applicable. Professional growth credit can be obtained through UOP's Courses4Teachers, with additional work performed.

For more information, please visit the Coastal Commission's Public Education website at coastforyou.org
