

DOES THE TIDE SEEM HIGH?

The California King Tides Project helps us visualize future sea level by observing the highest high tides of today.

Help collect important data by taking pictures of flooding from these particularly high tides.

Visit the project website to find your local high tide times and how to submit photos to the project.

2026/27 Upcoming King Tides:

November 24-26

December 23-25

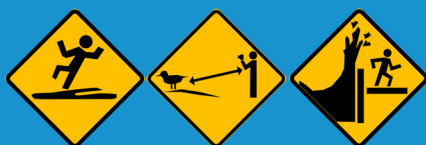

January 21-22

Northern California locations
may also include Dec. 22,
Jan. 20, and/or Jan. 23.
