

DESCRIPTION

This CCA watershed flows into the ‘Año Nuevo’ Area of Special Biological Significance (ASBS), located offshore of Año Nuevo Point and Island, which is north of Santa Cruz and south of Half Moon Bay. This ASBS lies entirely within the Monterey Bay National Marine Sanctuary, and has 4.9 miles of coastline. The shoreline of this CCA includes the Año Nuevo State Reserve, which is managed by the Department of Parks and Recreation, and provides a unique habitat for wintering sea lions and elephant seals. Access to beaches is limited; most visitors to the park are confined to marked footpaths, and trail bypasses are sources of erosion and downstream sedimentation.

There are 17 natural streams or gullies that drain into the ASBS; the most significant are from the rural watersheds of Año Nuevo Creek to the south, and Cascade Creek to the north. Highway 1 is also a source of road runoff, and is located in those watersheds. Farming (primarily artichokes, brussel sprouts, and flowers) is conducted adjacent to and within the reserve boundaries. There are direct nonpoint source (NPS) discharges into the ASBS from those agricultural fields, and agricultural discharges may influence the streams as well.

MAJOR EFFORTS TO IMPLEMENT NPS MANAGEMENT MEASURES

a)	San Gregorio Environmental Resource Center			http://www.sgerc.org/
	Catherine Swatland	(650) 726-2499	sgerc@sanmateo.org	
➤ Preserve and protect habitat for endangered species in the Santa Cruz Mountains bioregion (San Gregorio watershed and San Mateo County coast) through education, monitoring, research, habitat preservation and restoration.				
b)	San Mateo County Resource Conservation District			http://www.sanmateorcd.org/
	Mike Ednoff	(650) 712-7755	smrcrd@earthlink.net	
➤ The SMC RCD gets involved after decisions are made to work proactively with people to do good things for the land, water and other natural resources in coastal San Mateo County.
