

DESCRIPTION

‘Double Point’ State Area of Special Biological Significance (ASBS), located in Marin County, has only 0.7 miles of coastline; a portion of the ASBS lies in the Gulf of the Farallones National Marine Sanctuary. This area is in a rural part of the Point Reyes National Seashore, and the National Park Service manages the shoreline of this CCA. The area surrounding Double Point is accessible only to hikers, and has primitive trail camps to the north and east of this ASBS.

Overflow from the naturally occurring Pelican Lake is the main drainage source into the Double Point area. This lake appears to have little or no access to hikers and is located in a wilderness watershed.
